

#celestial-support

[09:02]

Michael:

Hey Uriel. We have a situation. The walls of Jericho just... fell.

[09:03]

Uriel:

Were the trumpet filters still disabled?

[09:04]

Michael:

They walked around the perimeter seven times, then blasted horns. Total structural collapse.

[09:05]

Uriel:

sigh That was in the CVE bulletin from the last millennium. Echo buffer overflow.

[09:06]

Michael:

Can we roll back the infrastructure?

[09:07]

Uriel:

Attempting restore from Jericho.snapshot.1057.BC...

[09:08]

Uriel:

(10%) (27%) (53%) -- ERROR: Integrity Check Failed. Too Much Trumpet.

[09:09]

Michael:

What's the fallback plan?

[09:10]

Uriel:

Log it as 'divinely unsalvageable'. I'll file a cosmic CVE.

[09:11]

Uriel:

JerichoWall v3.2 was never designed for harmonic warfare.

[09:12]

Michael:

We need a patch for future fortifications.

[09:13]

Uriel:

I'll issue a hardening advisory. Deploy AngelWall v4.0 with acoustic dampening runes.

[09:14]

#celestial-support

Michael:

You're the best, Uriel.

[09:15]

Uriel:

I know.
